

Croker Cumflow RP50XD MK2, RP100XD MK2 & RP150XD MK2 Rotating Pan Mixers

Croker have been producing Pan Mixers for over 50 years and have the experience to satisfy the specialist requirements of any industry where reliable & consistent mixing is essential.

Croker Rotating Pan Mixers are renowned for producing a very high quality material and are therefore the mixer of choice when producing artificial or architectural stone products or if a laboratory quality concrete is required.

Croker mixers are used extensively in the manufacture of refractory products.

The advanced design of the **Croker Rotating Pan Mixer** range incorporates twin drives with separate geared motor units powering the rotating pan and mixing star, which together with the twin spring mounted mixing blades and fixed scraper blade enables the mixers to produce the high quality mix for which they are renowned.
